

Guide to Using the

GLEIM® Private Pilot Kit

Thank you for purchasing your Gleim Private Pilot kit.
You are now much closer to becoming an FAA licensed pilot!
Use the steps below to learn how to use this proven system for success.

Step 1

Remove the contents of the box and separate them into the groups illustrated below.

Knowledge test

Reference

Flight training

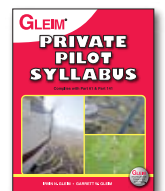

Training accessories

Give to a friend

Step 2

Read the Introduction of the Gleim *Private Pilot Syllabus* book to learn when and how to use each item in your kit.

Step 3

- Study for your FAA Knowledge Test using the Gleim Online Ground School. This course will thoroughly prepare you to pass this test.
 - Supplement this course by using the *Private Pilot Knowledge Test* book, Test Prep Software, and FAA Audio Reviews to gain mastery over the material and build confidence.
- PASS your FAA Knowledge Test and begin flying with a flight instructor.
 - To find a CFI in your area, visit: Gleim.com/aviation/CFI/search.

Step 4

- Complete the ground and flight lessons as your flight instructor assigns them to you. These lessons can be found in the Gleim *Private Pilot Syllabus*, and Training Record.
 - You will use the *Private Flight Maneuvers* book, *Pilot Handbook*, *FAR/AIM*, and training accessories during your flight training to learn the material.
- PASS the FAA Private Pilot practical test and become a Private Pilot!

If you need assistance in using this kit, contact our Aviation Training Consultants using the contact information below or watch an overview at: www.gleim.com/privatekit.

In Summary

FAA Knowledge Test: Complete 11 study units of outlines and practice questions. Then PASS your 60 multiple-choice-question knowledge test at a CATS or PSI/LaserGrade testing center.

FAA Practical Test: Complete 25 flight lessons while studying the 47 required “tasks” from the FAA Practical Test Standards. As you encounter each task in your study, understand the task and its requirements so you can explain it to your flight instructor and your FAA practical test examiner when they ask (we explain, illustrate, and discuss each task).
